

Organized by:

2 DAYS WORKSHOP

# Corporate Valuation, Scenario & Sensitivity Analysis in Excel

This advanced financial modeling course will teach you how to perform Excel scenario and sensitivity analysis with a focus on practical applications for professionals working in banking, leasing company, financial planning & analysis (FP&A), and finance functions. The tutorial goes step by step through all the formulas and functions required to perform the analysis in Excel from scratch.

This course will also provides participants with the skills needed to perform detailed business valuation modeling using three main methods: Comps, Precedents and DCF Analysis. The valuation training provided in this series will be particularly valuable to those who are looking for a detailed and step-bystep explanation of how to value a company based on comparable companies, past M&A transactions and a Discounted Cash Flow Model (DCF). All Excel template in this course is given to participants and can be used as an example in our own work.
